

### **AquaFinesse® Floor Tab - No Slip**

- Reduces floor slipperiness by up to 88% (average)
- Simple application
- Environmentally friendly
- Gentle, will not damage flooring as harsh chemicals do
- No specialist equipment needed
- Used throughout the industry
- Outstanding results!

### **Instructions for use:**

Banish dangerous slippery surfaces from around your pool or wet area!

The best results are achieved with an overnight soak, therefore we recommend treating the floor area after the establishment is closed for the evening.

Add 1 AquaFinesse® Floor tablet per 10 litres of water, stir to dissolve. Using a mop, apply liberally to floor area. (For severely slippery surfaces, 2 AquaFinesse® Floor tablets may be added per 10 litres of water).

Leave overnight to dry naturally.

Use a hose or simply mop with clean water the following morning.

To maintain results treatment should be repeated weekly.
