

## BESTO INFLATABLE 100N JUNIOR

### BESTO 100N JUNIOR LIFEJACKETS

This jacket is specially designed for young children from appr. 20 kg. The Besto junior lifejackets are always automatically and manually activated. It has a very good body fit due to the soft outer cover and special neck shape. The collar is strapped onto the back, this gives a comfortable neck fit.

When inflated, by means of the 24 grams CO2 cylinder, the jackets have 100N buoyancy that gives a good neck/ head support, a good in water body position as well as a high Freeboard.

- All off the junior jackets come standard with a crotch strap, to enhance performance and freeboard.
- Also standard on all the juniors is the integrated Safety Harness.
- The juniors are available in Red, Ocean Blue and Pink

### JUNIOR PRO

The Junior Pro is an Upgraded/ Enhanced lifejacket with extra standard featured items on, as:

- Reflective panel on cover for extra safety
- Pro sensor due indicator mechanism and inspection window. This to check in one glance if the automatic is "operational"
- Fleece collar for extra neck comfort.
